

- **Robust design for arduous applications**
- **Return-to-center or return-to-end options**
- **Under-panel depth minimized to 9mm**
- **Rated for 40 million cycles**
- **Hall-effect sensor technology**
- **Dual outputs with sense and voltage span options**
- **IP67 sealing above panel**
- **Color-coded 'Tab' options**
- **Can be supplied as 'base-only' so the colored tabs can be fitted at final installation**

The JC1200 offers the next generation of paddle joystick from Curtiss-Wright to build on the success of the Penny & Giles potentiometric JC120. This new joystick utilizes non-contacting, Hall-effect sensing technology for long-life integrity of the output signal. Operating feel has been an important part of this new development to make this unit as smooth and easy to operate as possible throughout an industry-leading 40 million cycle life.

Hall-effect sensing eliminates contact wear and provides safety functionality via dual outputs, which can be set to positive or negative ramps, or a combination of both. Electronic robustness is assured with sealing of the internal PCB to a rating of IP65, while a joystick to panel rating of IP67 can be achieved.

A choice of paddle 'Tabs' is available in nine different colors. These can be fitted at the factory or supplied as loose parts to be selected as part of the final installation process.

Panel Mounting Details - Non-Standard

Minimum joystick separation is 19mm

ELECTRICAL CONNECTIONS

Molex 70553-0006 7-pin connector with gold-plated pins

Recommended mating connector either:
Molex 70400 14-56-2074 (connector and pin kit)
or Molex 70066 50-57-9407 connector body plus 7 pins to the Molex number 70058 16-02-0082.

Note: the mating connector must be fitted with gold-plated pins to ensure stable output from the joystick

Standard Cables with a connector fitted are available from Curtiss Wright as follows:

CW part number SA301649 – cable length 500 mm
CW part number SA308599 – cable length 1,000 mm

Pin	Function
A	Not connected
B	5V supply
C	Output 1
D	0V supply
E	Output 2
F	Not connected
G	Not connected

SPECIFICATIONS

ELECTRICAL

SUPPLY VOLTAGE	5Vdc \pm 0.5Vdc
SUPPLY CURRENT	\leq 25mA (12.5mA max. per channel)
OVER-VOLTAGE PROTECTION	Up to 10Vdc (-40°C to 80°C)
SHORT-CIRCUIT PROTECTION TO GND	Yes
SHORT-CIRCUIT PROTECTION TO SUPPLY	Yes
REVERSE POLARITY PROTECTION	10Vdc continuous
POWER-ON SETTLEMENT	< 1s
RESOLUTION	12-bit (0.025% of measurement range)
NON-LINEARITY	\pm 0.4%
TEMPERATURE COEFFICIENT	\leq 30ppm/°C
TRACKING ERROR	\pm 2%
OUTPUT CLAMPING	Yes (1% above and below the Maximum and Minimum end voltage values) Note: Clamping limits still apply to output voltage after life
OUTPUT TYPE	Dual analogue ratiometric (crossed or parallel)
OUTPUT RANGE: AS SUPPLIED	10-90% \pm 2% of supply voltage (0.5-4.5V nominal) – see after life note below 20-80% \pm 2% of supply voltage (1.0-4.0V nominal) – see after life note below
CENTER VOLTAGE: AS SUPPLIED	48% to 52% of supply voltage – see after life note below
TOLERANCE OF OUTPUT VOLTAGE AT ENDS OF TRAVEL AND CENTER POSITION AFTER LIFE	After 10 million cycles: \pm 3%

MECHANICAL

MECHANICAL LIFE	> 40 million cycles at 3Hz (cycle is center to one end, to other end and back to center)	
MECHANICAL ANGLE	\pm 30° \pm 1° (return to center)	
	60° \pm 2° (return to end)	
BREAKOUT FORCE AT JOYSTICK TIP	1.0N	
OPERATIVE FORCE AT END OF TRAVEL AT JOYSTICK TIP	3.5N	
MAXIMUM FORCE ON JOYSTICK TIP	50N in-line, 50N transverse	
WEIGHT	\leq 40g	
VIBRATION - SINUSOIDAL	EN 60068-2-6: 2008	1 hour in X, Y and Z axes, 10Hz and 200Hz at 3gn
VIBRATION - SHOCK	EN 60068-2-27: 2008	50g, 6ms, Half Sine, 3 shocks in each of 6 directions
VIBRATION - RANDOM	EN 60068-2-64: 2008	3.6GN, 10-200HZ, 2 hours per axis
BUMP TEST	EN 60068-2-29: 2008	25G, 10MS, 500 Bumps in each of 6 directions
FREE FALL DROP TEST	EN 60068-2-31: 1993	1.0m at Level C, 1.2m at level E

EMC

RADIATED EMISSIONS	EN 61000-6-4: 2011	30MHz to 1GHz
IMMUNITY	EN 61000-4-3: 2002	100V/M, 80MHz to 1GHz and 1.4GHz to 2.7GHz
CONDUCTED DISTURBANCE IMMUNITY	EN 61000-4-6: 2009	150kHz to 80MHz, 3Vrms, 80%AM, 1kHz sine
ESD	EN 61000-4-2 level 2: 1995	4KV contact (including connector pins) , 4KV Air
POWER FIELD IMMUNITY	EN 61000-4-8 level 4: 1993	30A/m, 50Hz and 60Hz

ENVIRONMENTAL AND LEGISLATIVE

OPERATING TEMPERATURE	-40°C to 85°C	Temperature cycle per EN 60068-2-14: 1999 Thermal shock to EN 60068-2-14: 1999 Temperature and humidity to EN 60068-2-38: 2009
STORAGE TEMPERATURE	-40°C to 85°C	Cold test to EN 60068-2-1: 1993 Dry heat to EN 60068-2-2: 1993
WATER AND DUST INGRESS	IP67 above panel IP55 below panel, including connector	Panel sealing performance is dependent on the stiffness and surface condition of the panel i.e. free of scratches. It is the responsibility of the customer to define the panel material and thickness to achieve the seal rating
SALT SPRAY	EN 60068-2-11: 1999	
MTTF'd	> 100 years	

IMPORTANT INFORMATION

Whilst Curtiss-Wright Industrial Group - Penny & Giles has designed this joystick to meet a range of applications it is the responsibility of the customer to ensure it meets their specific requirement.

Penny & Giles Controls Ltd makes no warranty or representation in respect of product fitness or suitability for any particular design application, environment, or otherwise, except as may subsequently be agreed in contract for the sale and purchase of products. Customers should therefore satisfy themselves of the actual performance requirements and subsequently the product's suitability for any particular design application and the environment in which the product is to be used.

Continual research and development may require change to products and specification without prior notification.
