

Bringing new levels of realism and vehicle protection to VRU testing

Soft Pedestrian 360™

The Soft Pedestrian 360™ from DRI is the next generation of articulated surrogate pedestrian target, bringing a whole new level of realism to VRU testing.

Sophisticated articulation including upper body joints enables naturalistic movement and the ability to synchronise gait with platform speed, so that acceleration and deceleration are more realistic than ever. The Soft Pedestrian 360's realistic gait even extends to running, which actually looks like running, not simply fast walking.

Developed by the same team from DRI that brought us the iconic Soft Car 360™, the Soft Pedestrian 360 is the result of years of real-world testing experience gained working with the world's leading OEMs and the National Highway Traffic Safety Administration (NHTSA).

Fully programmable articulation of hip, knee, shoulder and neck for realistic motion

Complies with ISO 19206-2: Test devices - Requirements for pedestrian targets

Gait can be synchronised with platform speed for natural looking acceleration and deceleration

Sophisticated articulation ensures natural gait even at running speeds

No exposed plastic or metal components that can damage vehicle panels and windscreens

Durable servo design with foam protection and clutch mechanism to prevent from being back driven

Modular design for easy reassembly

Compatible with common VRU platforms

Specifications

Dimensions

Height	1800mm
Shoulder width	500mm
Weight	6kg (fully articulated)

Performance

Maximum collision speed	80km/h
Water resistance	Optional

Supported sensor testing

Ultrasonic	Yes
Mono/stereo camera	Yes
Lidar	Yes
Radar	Yes
Near infrared	Yes

Articulation options

Full	Hip, knee, shoulder, neck
Standard	Hip, knee, shoulder
Basic	Hip, knee

Compliance

ISO 19206-2	Yes
-------------	-----

Designed for test engineers by test engineers

The Soft Pedestrian 360 is designed and engineered by Dynamic Research, Inc (DRI) in California. For decades DRI has provided research and testing services for the world's leading OEMs, completing hundreds of tests per year, including FMVSS, NHTSA NCAP and Euro NCAP tests.

DRI has leveraged its extensive hands-on experience with test targets and equipment in nearly every possible scenario to design, develop, and produce a range of best-in-class surrogate targets such as the Soft Car 360.

About AB Dynamics

AB Dynamics is a leading global provider of automotive test and verification solutions that facilitate the development of vehicles that are safer, more efficient and sustainable. As part of the AB Dynamics Group of companies we enable customers to develop and test in virtual environments, validate on the track and then evaluate vehicles on public roads.
