

# Moshon<sup>DATA</sup>

Your partner for vehicle targets

Whether you need a Pedestrian Target to Euro NCAP standard or non standard...

... MoshonData is your one-stop-shop for all VRU target solutions.

Moshon Data has a range of targets conforming to ISO standards:

Euro NCAP/ANCAP | UN R152 | C-NCAP | C-IASI | JNCAP | KNCAP | ASEAN NCAP | U.S. NCAP | IIHS | Latin NCAP | RCAR

## MD-VRU

### Pedestrian Targets for ADAS testing (PT VRU)

### Standard Euro NCAP Pedestrian Target (PT)

The following requirements need to be fulfilled to enable a proper recognition with regards to visual and radar detection:

- Dimensions conform to ACEA/Euro NCAP specifications for both adult & child
- Low reflective skin surfaces
- Black coloured head hair texture
- RCS and IR properties fit specification boundaries
- Available as Adult, Child and Teenager sizes

## Non-Standard Pedestrian Target Clothing

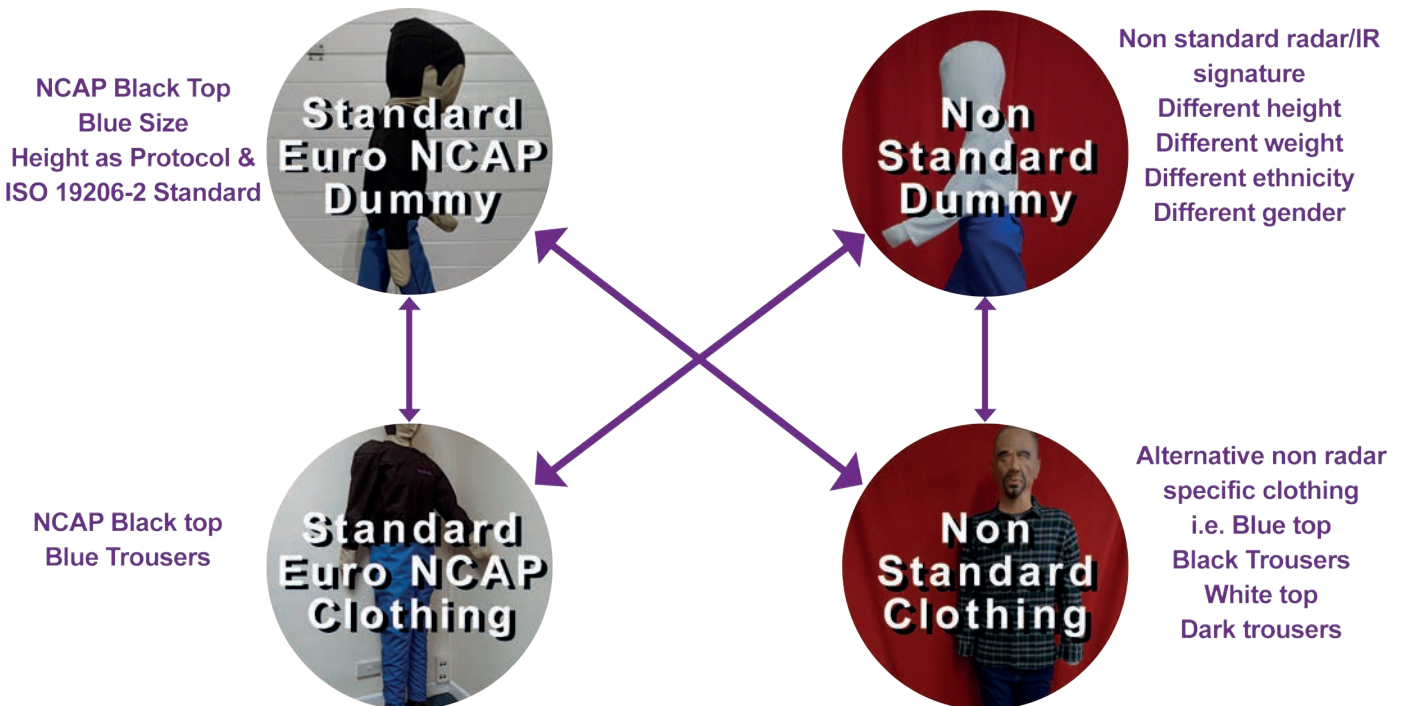

No particular radar/IR signature - but realistic of an equivalent real world person specification.

We celebrate everyone is different –  
We are not all the same...  
But all need protecting!!

- 📶 Different height, weight (Portly)
- 📶 Ethnicity
- 📶 Size, Build
- 📶 Gender

## MD-VRU Pedestrian Bundles for ADAS testing

## MD-ES

### E-Scooter and rider soft target for AEB testing

Developed to simulate a pedestrian riding an E-Scooter.

- 50 kph Impact
- All in one E-Scooter target combined with NCAP spec pedestrian
- Height adjustable wheels for ground contact, enabling rotation
- Durable yet soft structure design that maintains integrity when hit
- Fast setup, easy to use and lightweight  
Compatible with most LP platforms using 200 x 250 mm magnet spacing
- Comparable recognition for Radar, LiDAR, IR and camera based systems

## MD-VMC

### Vespa Style Scooter PTW and rider soft target for AEB testing

Developed to simulate a scooter and rider.

- On ground wheel rotation for radar Doppler affect
- Lightweight yet robust soft foam core
- Replaceable parts
- Compatible with most LP platforms using 200 x 500 mm spacing
- Wheel rotation on the ground for radar Doppler affect
- Comparable recognition for Radar, LiDAR, IR and camera based systems
- Built to ISO 19206-5 standard
- Suitable alternative for NCAP AEB VRU testing

## MD-SMC

### Streetbike Motorcycle PTW and rider soft target for AEB testing

Developed to simulate a UNECE category L3 streetbike PTW and rider.

- On ground wheel rotation for radar Doppler affect
- Lightweight yet robust soft foam core
- Replaceable parts
- Compatible with most LP platforms using 200 x 500 mm magnet spacing
- Comparable recognition for Radar, LiDAR, IR and camera based systems
- Built to ISO 19206-5 standard
- Suitable alternative for NCAP AEB VRU testing

#### LiDAR point cloud comparison between Motorcycle and MD-SMC target.

MD-SMC Target

Motorcycle

## MD-MC-R-CN (C-NCAP)

### Scooter and rider soft target for AEB testing

Developed to simulate a scooter and rider.

## Obstruction Foam Wall

Foam 3D walls to replicate Brick, Building Fronts or Custom Designs

RCAR MD-Cyclist coming soon.

- 8.8 m long obstruction wall
- Free standing on weighted base
- Modular design – 4 x 2.2 m sections  
Custom sizes available
- Suitable for use in the Euro NCAP AEB VRU test protocol
- Default brick wall image can be replaced with any image  
I.e. Shop fronts, houses etc.
- Radar Cross-Section (RCS) signature analysis (one section): average at 50m range: 23.80 dBm<sup>2</sup>  
\* Full RCS test report is available from Moshon Data by request

## Roadside Furniture (RCAR) (ISO standard where applicable)

Soft targets designed to create everyday road scenarios.
